About Me

A Developer who can Design, Develop & Deploy. nown for adaptability across the stack and a product-minded approach that sets me apart.

Education

Chandigarh University   **Aug 2024 – Aug 2028 (expected)**
Bachelor of Engineering   *Computer Science and Engineering*

Projects

FLux AO | *Arweave-AO, TS, LLM's*   **Grant Awarded**
- Built an **AI-powered** devtool for Arweave's AO that lets users run, test, and generate custom AO handlers using natural language via MCP integration.
- Awarded a **$5000 grant** for innovation in decentralized storage workflows.
- Integrated seamlessly with tools like Cursor and Claude; supported both local and remote setup with plug-and-play ease.

ArBet | *Lua, Web3, Game*   **May 2025**
- Released a 2D Rust-inspired RPG game incorporating on-chain Web3 contracts via Lua scripting.
- Implemented provably fair in-game mechanics backed by smart contract logic.
- Bridged real-time gameplay with blockchain interactions for enhanced transparency.

Miku-san | *Next.js, Editor, Portfolio*   **Dec 2024**
- Built a live portfolio-builder with inline editing—developers can instantly customize and preview personal sites.
- Enabled deployment from within the editor for seamless portfolio updates and providing users custom subdomain.
- Designed for minimal configuration, optimizing for speed and developer experience.

Experience

Web3 Developer   **Mar 2025 – Present**
Contract | Community
- Selected as a **Superdev by Superteam Solana** for consistent contributions and community-led development.
- Built a decentralized tool on **Arweave's Permaweb**, earning a **builder grant** for innovation.
- Developed fullstack dApps using **Solana**, leveraging **Anchor**, **TypeScript**, and wallet integrations (Phantom, Backpack).
- Contributed to open-source Web3 projects; focused on smart contract UI integrations and developer UX.

Fullstack Developer   **Oct 2024 – Present**
Dev/Mobile Developer | Freelance
- Designed multiple projects using Figma, Framer including multiple pages.
- Handled end-to-end project : wireframing, designing, development, and deployment.
- Designed and Developed Mobile App using ReactNative.

Technical Skills

- **Frontend:** React, Next.js, Vite, TailwindCSS, Framer-Motion, React Native
- **Backend:** Node.js, Express, PostgreSQL, MongoDB, Prisma, Supabase
- **Languages:** C, C++, JavaScript, TypeScript, Solidity, SQL, Rust, Lua
- **Tools:** Git, GitHub, Docker, Vercel, Render, Railway, Ts & Solana SDK

Achievements

- **Solana Fellowship:** Selected in the top 5% of Superdevs by Superteam India; also got accepted to Ackee School of Solana.
- **Arweave:** Among top 20 developers selected for the Arweave Hacker House (India); won **1st place** grant worth **$5000**.
- **LeetCode:** Solved 100+ DSA problems, consistently practicing core algorithms and data structures.
